DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 3,6,9 and 12 have been considered but are moot in view of the new ground of rejection.
2. Applicant's arguments, with respect to the provisional Double Patenting have been fully considered and are persuasive. The Double Patenting Rejection of claims 3,6,9 and 12 has been withdrawn.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3,6,9 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heinonen et al ("Heinonen"), U.S. Patent No. 5,857,151, previously used, in view of Nunokawa et al. (Nunokawa), U.S. Patent No. 5,982,877, recently discovered.

Regarding claims 3,6,9 and 12, Heinonen discloses a telephone set identifying method and apparatus, and PC card comprising the latter, and a computer-readable storage medium which stores a program for causing a computer which couples to a portable telephone set for identifying a type of portable telephone set to which a data processing apparatus is coupled, comprising the steps of:

identifying the type of the portable telephone set based on an allocation pattern of input and output terminals of a data interface part of the portable telephone set (i.e., reads on alignment to sensitivities corresponding to different current input groups or pattern or allocation) **(see col. 1, lines 35-50 and col. 2, lines 56-62).**

Heinonen fails to explicitly disclose said type of portable set including a mobile communication protocol and a Personal Handyphone System Communication protocol.

In a similar field of endeavor, Nunokawa discloses wherein said type of portable set including a mobile communication protocol and a Personal Handyphone System Communication protocol **(col. 31, line 66 to col. 32, line 28).**

At the time of the invention it would have been obvious to one ordinary skill in the art to modify Heinonen to include a portable recording medium which interfaces with a telephone set and is connected to a mobile communication protocol and Personal Handyphone System for the purpose of authenticating and registering user Ids associated with external interface (see col. 32, lines 29-49).
